

**Fitting the brackets**

The brackets offer two methods of installation:

**Top-Fixing**

Use the single hole in the top of the bracket to fix to the lintel (the 'ceiling' of the recess). The protruding tab on the bracket should be closest to the window

**Face-Fixing**

Join the bracket to the 'L' shaped face-fixing plate. Use two screws through the back plate to mount onto a facing surface (a wall or window frame)

Note that the position of the outermost brackets should be at least 5cm away from the ends of the rail, with any other brackets evenly distributed across the width.

**Fitting the blind**

Situate the front lip of the headrail into the front of the bracket.

Push the back of the headrail upwards to lock it into the back of the bracket.

To release the blind from the brackets, push up firmly against the tab protruding at the bracket while twisting the back of the headrail downwards.

On the front of the swing tag that comes with your blind, you'll find a handy QR code you can scan with your phone. Scan this to download the SmartView app - you'll be setting up your blinds in moments!
