

Designed for DIY...

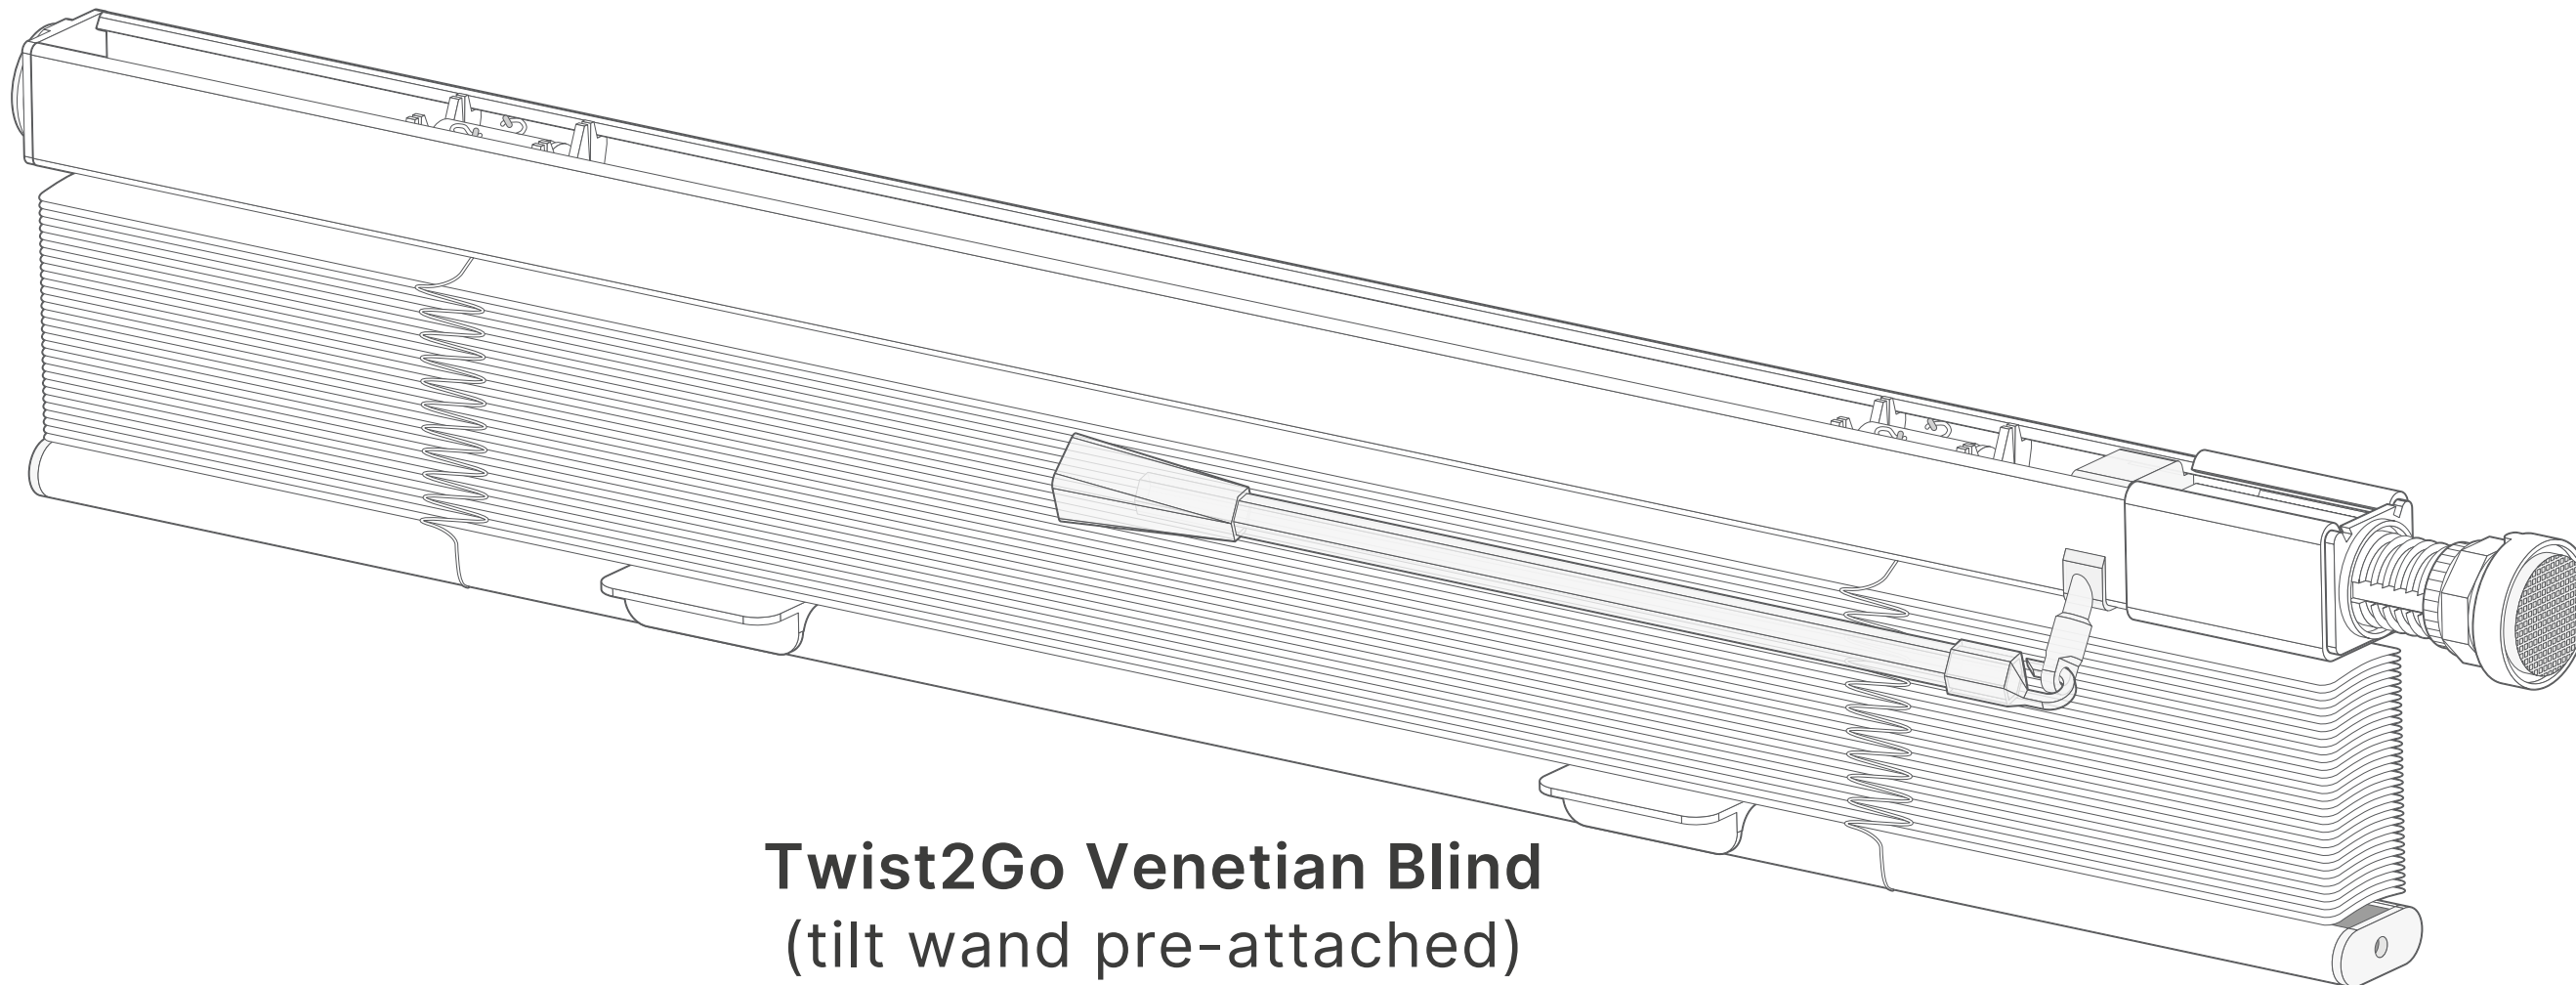

Our Twist2Go Venetian Blinds are designed to be installed by you, without specialist fitters, even if you don't have much DIY experience.

Featuring our clever Twist2Go system, they can be installed quickly with no drilling and no mess.

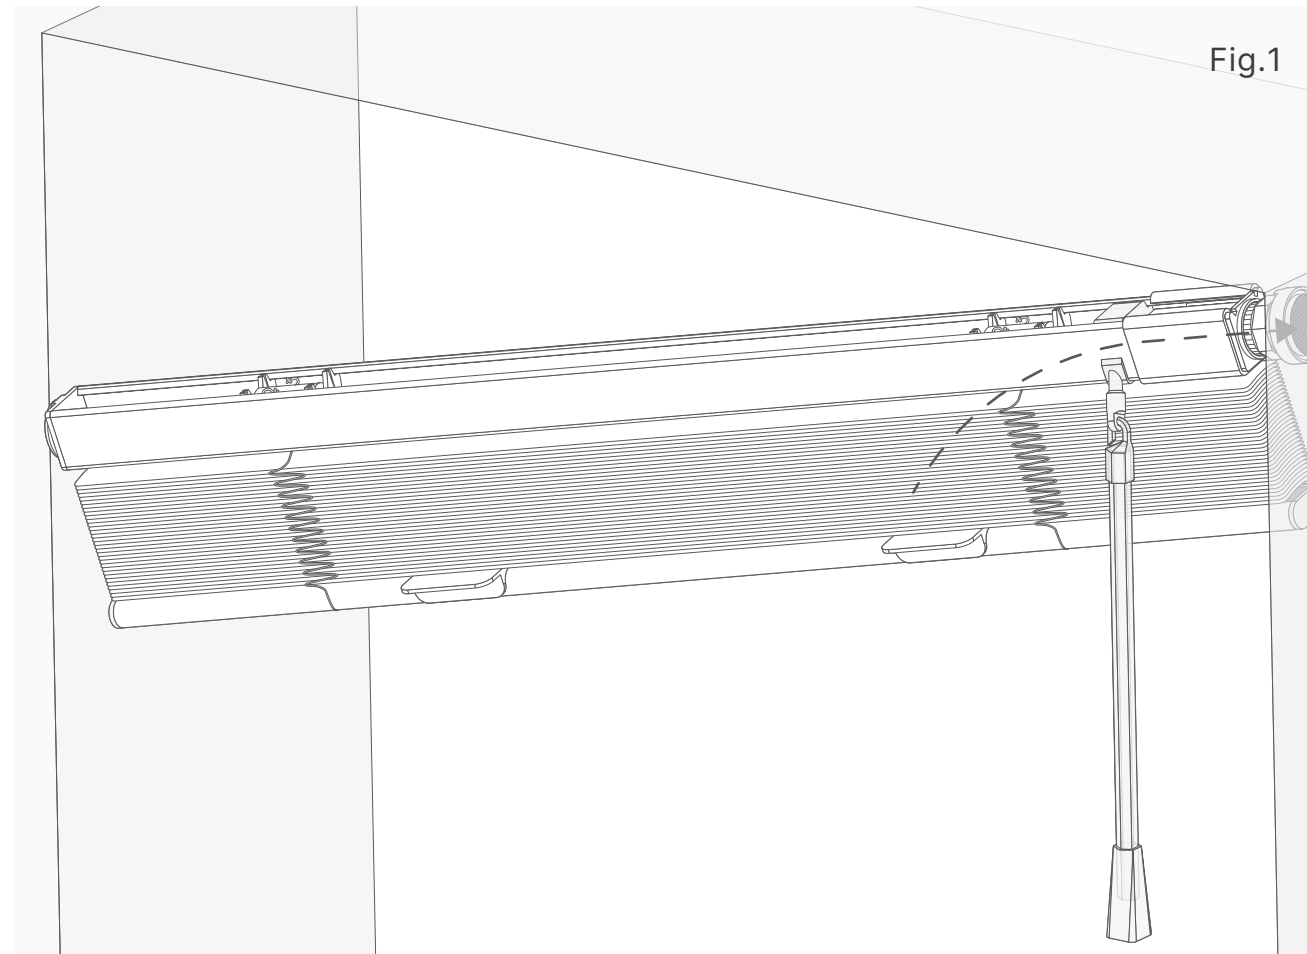

Please read each page of this guide carefully during installation, following along one step at a time.

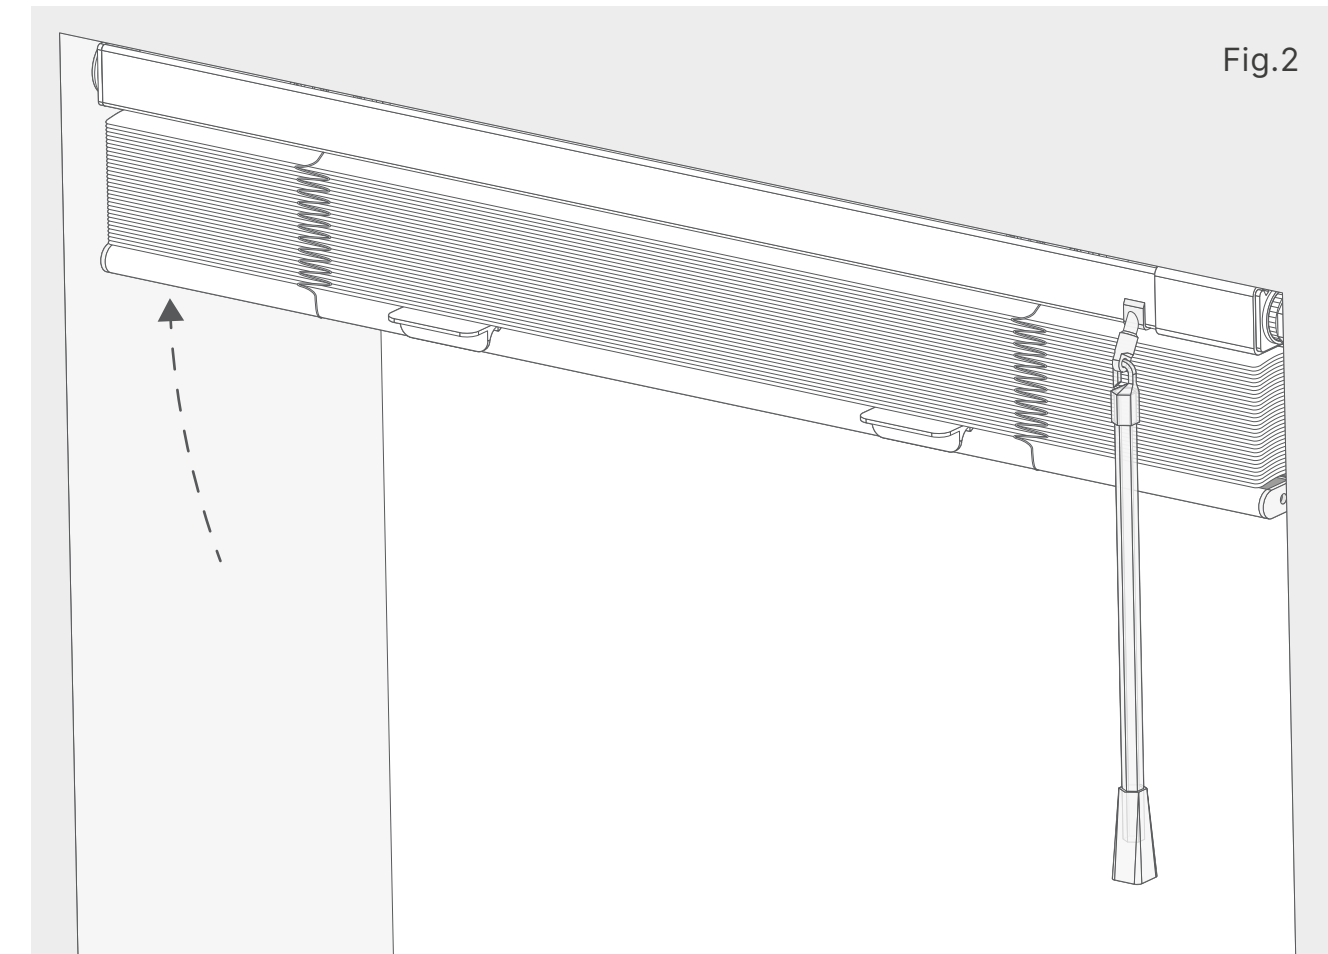

Parts contained in your order...

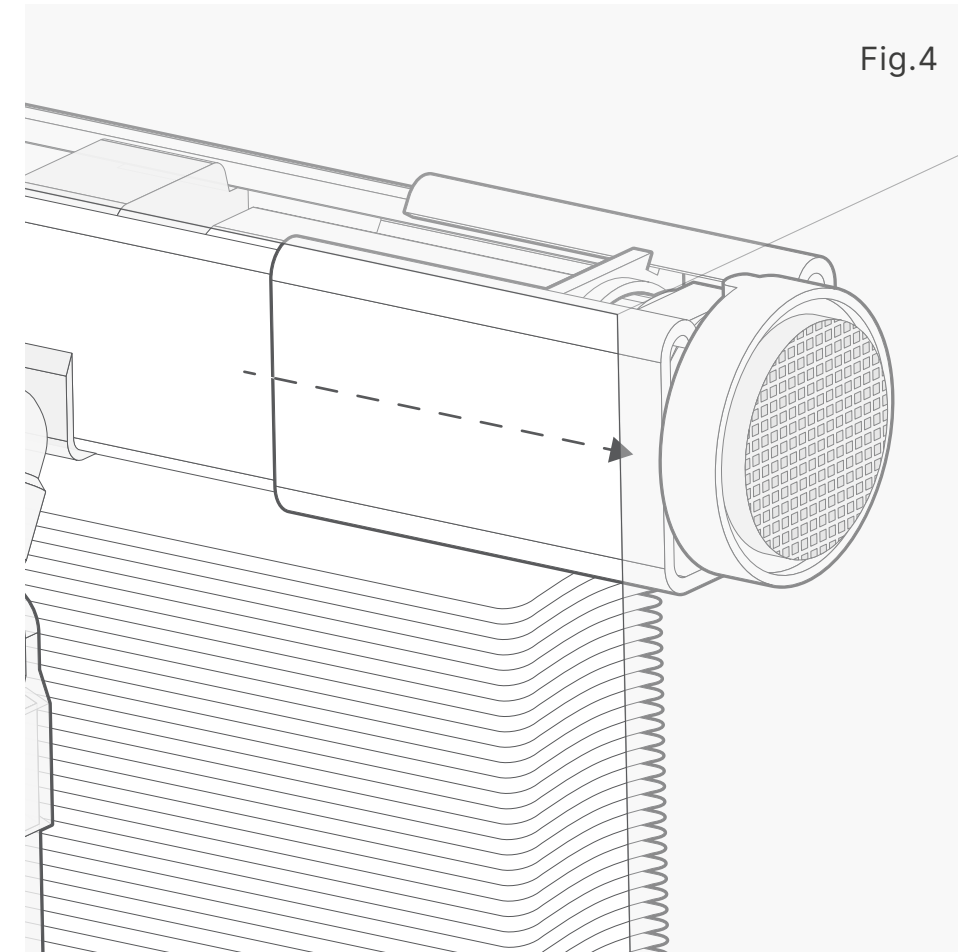

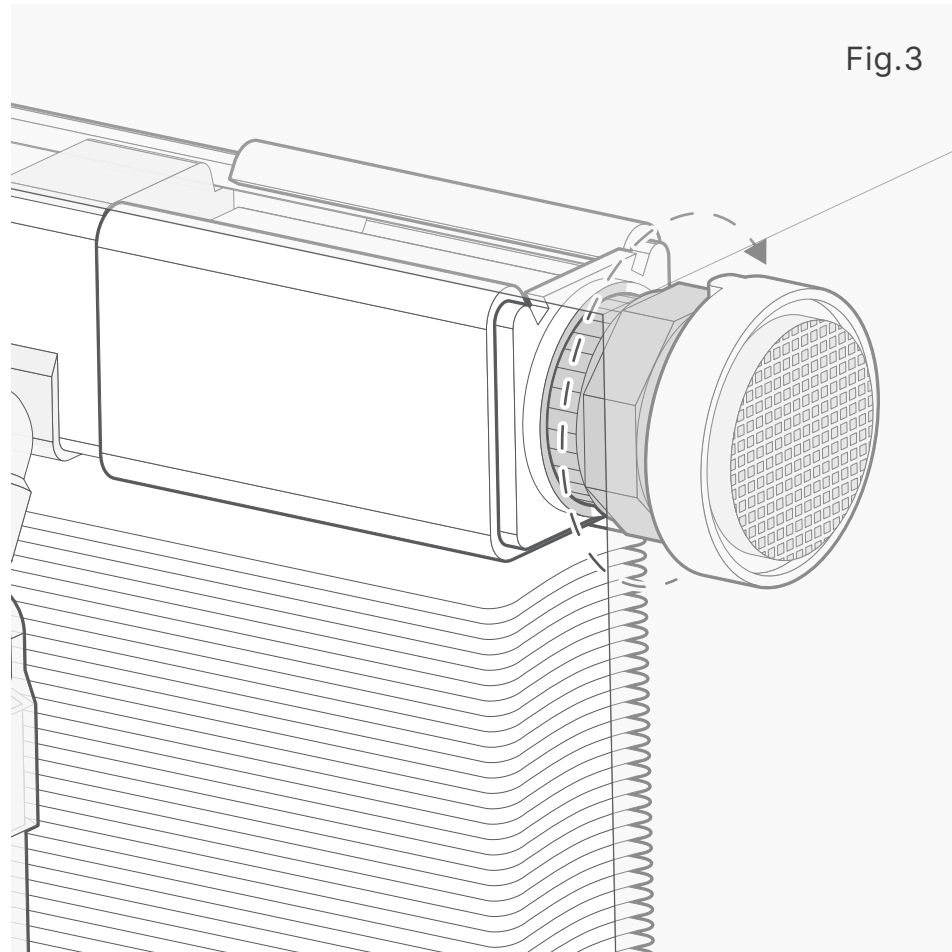

Twist2Go Venetian Blind
(tilt wand pre-attached)

Raise the blind into the recess, pushing the Twist2Go depression pad against the wall.

Raise the opposite end of the blind up, until the blind is sitting straight and level.

Hold the blind in position, then twist the tightening wheel on the end of the blind **clockwise** until it's nice and tight (Fig.3). This will lock the Twist2Go mechanism and prevent the blind from slipping.

Lastly, slide the covering sleeve on the headrail over the tightening wheel (Fig.4), covering the Twist2Go mechanism and providing a neat finish.

And that's it! After just those few steps, your Twist2Go Venetian Blind is installed and ready to enjoy.

TOP TIP

The tightening wheel is always turned clockwise to tighten, whether it's on the left or right side of the blind.
